ABOUT EASTER SEALS RI

Easter Seals RI provides exceptional services to ensure that all children and young adults with special needs and disabilities and their families have equal opportunities to live, learn, work and play in their communities.

Easter Seals RI served over 300 people last year through Early Intervention Services and the Pediatric Outpatient Program.

Early Intervention offers evaluation, education and therapy services from birth to age 3. Comprehensive evaluations of all areas of development detect early problems in learning, language, motor and social skills, as well as signs of disabilities.

The Pediatric Outpatient Program provides outpatient occupational therapy services for children and teenagers, through age 21. Individualized service is focused on developing the child’s ability to perform everyday living activities by enhancing or restoring function.
