

# Easterseals Vermont Program Overview

Easterseals Vermont's programs and services are family-centered and focus on creating connection, stability, and long-term well-being. We serve children, young adults, and families through the following core programs:

## Child & Family Support

Through parental coaching, coordination, and transportation support, we help families who are struggling spend quality, healthy time together. We also support families overcoming specific and potential custody-severing challenges by providing care coordination activities, family safety planning, substance use testing, and by finding previously unknown or lost family members who may provide support, shelter, or additional love and assistance.

## Youth Development

Promoting independence for teens and young adults ages 14 to 22 transitioning out of foster care to adulthood by helping youth identify and attain their goals around things like stable housing, securing employment, and post-secondary education.

## Post Permanency Services

Supporting families formed by adoption or guardianship with in-home adjusted parenting education, consultation to treatment and school teams, and community resource referrals.

## Prevention and Stabilization Services

Serving at-risk youth between the ages of 12 and 23 in Rutland county. The program supports youth and families in developing well-being, education and employment, permanent connections, and stable living environments as youth transition to adulthood.

## Balanced and Restorative Justice

Enhancing youth-focused restorative justice by creating a learning environment, identifying skills and resource gaps, and supporting youth to become productive and invested members of their community.

## Intensive Family Based Services

Supporting children and their families facing challenges that threaten their stability and safety at home and in their community through clinically guided assessments, case management, facilitating community connections, family safety planning, and therapeutic services.
