

Spencer's Story

"We are thankful that we were able to use Easter Seals services to identify our son's Asperger's Syndrome so early in his development!"

- Spencer's parents.

Spencer is an energetic six year old boy! He loves to play basketball, ride his electric scooter, play with the neighborhood kids, and of course, play his video games. He loves math and everything electronic! Summer is one of his favorite times of year. He loves jumping on the trampoline and swimming in the pool with his big sister.

Spencer was diagnosed by Easter Seals with Asperger's Syndrome when he was only 4 years old. Thanks to his therapist at Easter Seals, his family was able to gain an understanding of what Asperger's is, and how to better communicate with Spencer and recognize certain situations that might be difficult for him.
